

YASTEEL SEWNARAIN

Backend Developer

About me

Backend developer with a tactical, iterative learning style and a strong foundation in Java, Spring Boot, SQL and Golang. Former educator and finance professional turned engineer, driven by curiosity, clarity, and real-world problem-solving. Experienced in building and debugging backend APIs, designing DTOs, and aligning models for maintainability. Passionate about problem solving, semantic clarity, and sustainable growth in tech.

Gauteng, South Africa

Technical Skills

Languages & Frameworks:

- Java & Spring Boot – Used in backend projects for RESTful API development.
- Go (Golang) – Exploring backend architecture and clean CRUD scaffolding with idiomatic Go practices.
- JavaScript – Built interactive browser-based RPG with modular turn-based logic.
- HTML & CSS – Applied in game for personal project on portfolio.

Backend & API Development:

- RESTful API design and testing with Postman
- DTO structuring for safe partial updates and model alignment
- SQL & PostgreSQL – Schema design, querying, and integration with SQLBoiler.
- Git version control and tactical debugging/

Tools & Practices:

- Tactical logging for traceability in production-like environments.
- Documentation and README authoring for portfolio clarity.

Education

PGCE (FET Phase – Accounting), Mancosa

BAccSci, University of the Witwatersrand

Full Stack Dev Certification, FNB App Academy

Language

- English (Native)
- Afrikaans (intermediate)
- Japanese (basic)
- Hindi (basic)

Expertise

- API Design
- DTO Structuring
- UUID Handling
- SQL Queries
- Go & Java
- Spring Boot
- Postman Testing
- Debugging
- Logging
- Git Workflow
- Modular CRUD
- Partial Updates

Achievements

- Dux student
- 90% Matric average
- Prefect
- Public Speaking award (first place from 150)
- Multiple awards for highest mark in various subjects
- Represented Gauteng in chess.
